

SPLASH-GUARD KIT INSTALLATION

Keep water, cleaning agents and soap spray right where you want them.

Splash-Guard Kit (MS3080)

Installation Instructions

1. Disconnect your MotorScrubber from the power supply. Unscrew and remove hub

2. Remove the screws that hold the base plate to the motor housing without removing the base plate.

3. Attach the splash-guard bracket with the base plate screws. Start with any screw then insert the opposite one, tighten. Tighten the remaining six screws in the same manner.

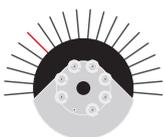

4. Attach the velcro deflector to bracket, starting in one corner and working to the other corner.

5. Re-attach hub.

6. Twist-lock brush to the hub and reconnect the power supply.

200° "Work Zone" and
160° of Splash Protection.
