

AQUASNAP™

ATP Water Testing Device

Aquasnap is a user-friendly, self-contained ATP water testing device used in conjunction with Hygiene luminometers. This pen-sized testing device is easy to use, economical, and gives real time results. The honeycomb-shaped dipper collects 100 µl of water ensuring consistent sample collection. Aquasnap uses a liquid-stable reagent in place of freeze-dried enzymes giving it superior reproducibility and sensitivity.

Key Features

- All-in-one testing device
- Simple, quick, and easy to use
- Results in seconds
- Unique liquid-stable reagent provides unprecedented accuracy and reproducibility
- 12-month shelf life at refrigerated temperature (2-8°C)
- 4-week shelf life at room temperature (21°C)
- Tolerant to temperature abuse
- Collects 100 µl of sample
- Costs up to 40% less than other ATP water tests

Ideal for

- CIP systems
- Cooling towers
- Water quality assessment
- Paper manufacturing
- Bioburden testing
